

WEEE Disposal

Deutsche Version: [Entsorgung von Geräten von Lobaro](#).

This page informs you on our policy in respect to EU "Waste electrical and electronic equipment Directive" 2002/96/EC, implemented in German law by the "Gesetz über das Inverkehrbringen, die Rücknahme und die umweltverträgliche Entsorgung von Elektro- und Elektronikgeräten (Elektro- und Elektronikgerätegesetz – ElektroG)". The following statements about the disposal of retired Lobaro devices are binding for customers in Germany. Customers in other countries should contact their local authorities in order to acquire equivalent information for their respective country.

It is a major goal of EU directive 2002/96/EC to reduce the amount of retired electronic devices disposed in household waste, but have them gathered in special facilities instead for recycling and orderly disposal. Electronic devices often contain hazardous substances which are harmful to the environment as well as to human health. Under no circumstances should they be disposed in household trash.

WEEE

The WEEE-directive is the EU-directive "Waste of Electrical and Electronic Equipment" (2002/96/EC). It aims to reduce the growing amount of electrical and electronic waste created by disposed electronic devices. The goal is to avoid and reduce disposal, and to make the disposal more friendly for the environment, by including the manufacturer in a broader responsibility.

Proper disposal of Lobaro B2B devices

Lobaro develops and manufactures devices for professional use. Because of this, our products have been recognized by the responsible agency "Stiftung EAR" (Elektro-Altgeräte Register) as B2B (business to business) products. Lobaro GmbH is registered under DE18824018.

Classification as B2B implies that Lobaro is not required to pick up disposed electronic devices from local recycling points, as the law "ElektroG" dictates manufacturers of consumer electronics to do.

Consequently, our products may not be disposed in this way.

In order to provide opportunities for the return of old equipment, we cooperate with several qualified recycling companies. If a device manufactured by us has become an end-of-life device and you wish to return it as a domestic customer, please contact: <https://www.take-e-way.de/leistungen/elektrogesetz-weee-elektrog/b2b-altgeraete-ruecknahme-entsorgung/> and complete the questionnaire. Customers in EU countries other than Germany should contact their local distributor and/or local authorities for relevant information.

RoHS

As a manufacturer of industrial devices of information and telecommunication technology we are producing conforming to RoHS as specified in the EU-directive 2011/65/EU.

Batteries

Lobaro GmbH is also registered under Reg-Nr. **DE87567817** according to the battery law (BattG). Conforming to the German law about the disposal of used batteries (§ 12 Satz 1 Nr. 1-3 BattV (Verordnung über die Rücknahme und Entsorgung gebrauchter Batterien und Akkumulatoren (BattVO) vom 27. März 1998 (BGBl. I S. 658))), we as the manufacturer advise you, that the customer and end-consumer is required by law to return used batteries for a proper disposal. After usage, batteries can be returned to the vendor or at a place close proximity free of charge. If used batteries are sent to the vendor, parcels must be sent fully postpaid.

The following symbol indicates, that a battery contains heavy metal or other hazardous substances, and that it must not be disposed in common household or industrial waste. The abbreviations under the symbol stand for:

Cd	Cadmium
----	---------

Hg	Mercury
Li	Lithium
Li-Ion	Lithium-Ion
Ni	Nickel
Mh	Metal Hydride
Pb	Lead
Zi	Zinc
